

EnWave Sells EU-GMP 10kW REV™ Machine to Pharmaceutical Cannabis Cultivator in Europe

Vancouver, B.C., June 29, 2022

EnWave Corporation (TSX-V:ENW | FSE:E4U) ("EnWave", or the "Company" - <https://www.commodity-tv.com/ondemand/companies/profil/enwave-corp/>) announced today that it has received a purchase order for an EU-GMP (European Union – Good Manufacturing Practice certified) 10kW Radiant Energy Vacuum (REV™) dehydration machine from an unnamed pharmaceutical cannabis company. The machine will be used to dry cannabis for medical consumption and for the creation of a wide range of derivative products. These products will be distributed into the European Union (EU) and legal worldwide markets.

The facility is located in a region with optimal climates for pharmaceutical cannabis cultivation. Using a combination of natural agricultural methods, automated processes, and scientific precision, the cultivator is aiming to achieve the highest standards by improving patients' lives and revolutionising modern medicine with an incredible range of applications.

About EnWave

EnWave is a global leader in the innovation and application of vacuum microwave dehydration. From its headquarters in Vancouver, BC, EnWave has developed a robust intellectual property portfolio, perfected its Radiant Energy Vacuum (REV™) technology, and transformed an innovative idea into a proven, consistent, and scalable drying solution for the food, pharmaceutical and cannabis industries that vastly outperforms traditional drying methods in efficiency, capacity, product quality, and cost.

With more than forty-five royalty-generating partners spanning twenty countries and five continents, EnWave's licensed partners are creating profitable, never-before-seen snacks and ingredients, improving the quality and consistency of their existing offerings, running leaner and getting to market faster with the company's patented technology, licensed machinery, and expert guidance.

In addition, EnWave established a Limited Liability Corporation, NutraDried Food Company, LLC, to manufacture, market and sell REV-dried snack products within North America, including the popular Moon Cheese® brand, and serve as a co-manufacturer for third parties.

EnWave's strategy is to sign royalty-bearing commercial licenses with food and cannabis producers who want to dry better, faster and more economical than freeze drying, rack drying and air drying, and enjoy the following benefits:

- Food and ingredients companies can produce exciting new products, reach optimal moisture levels up to seven times faster, and improve product taste, texture, color and nutritional value.
- Cannabis producers can dry four to six times faster, retain 20% more terpenes and 25% more cannabinoids, and achieve at least a 3-log reduction in crop-destroying microbes.
