

## Fury Continues to Expand the Hinge Target with Multiple Drill Intercepts, Conducts Board of Directors and Management Site Visit

VANCOUVER, Canada – August 3, 2023 – Fury Gold Mines Limited (TSX and NYSE American: FURY) (“Fury” or the “Company”) - <https://www.commodity-tv.com/ondemand/companies/profil/fury-gold-mines-ltd/> - is pleased to provide results for the first three 2023 core drill holes at the high-grade Eau Claire gold project located in the Eeyou Istchee Territory in the James Bay region of Quebec. The 2023 drill program to date has focused on the continued expansion of the Hinge Target located immediately west of the Eau Claire Deposit with the goal of updating the Eau Claire Mineral Resource Estimate at the end of the season. Drilling at the Hinge Target continues to return multiple stacked zones of gold mineralization from each drill hole including 5.0 metres (m) of 3.6 g/t Au within a broader interval of 14.0m of 2.37 g/t Au. Additional drill intercepts include 6.5m of 2.66 g/t Au, 6.0m of 2.77 g/t Au and 1.0m of 10.35 g/t Au (Table 1; Figure 1).

Drill holes 23EC-063 and 23EC-064 have expanded the Hinge Target gold mineralization 50m up-dip and 75m to the west respectively. Drill hole 23EC-064 represents the first of a series of infill drill holes designed to tighten up the spacing of the 2022 Hinge Target drilling to a nominal spacing of 60-80m. Importantly, the broad intercepts of 14.0m of 2.37 g/t Au, 6.0m of 2.77 g/t Au and 6.5m of 2.66 g/t Au continue to show the overall strength of the mineralized system within the Hinge Target.

These initial results provide confidence in the modeled sub-vertical geometry of the veining at the Hinge Target as the Company works towards a meaningful update to the currently defined Eau Claire Resource which was last estimated in 2018 at 853,000 ounces (oz) gold at an average grade of 6.18 g/t gold in the Measured and Indicated Category and 500,000 oz gold at 6.35 g/t gold in the inferred category<sup>1</sup>.

“Fury is pleased to announce the initial drill results from our 2023 drill program at Eau Claire, as these results further confirm our thesis that the Eau Claire resource is open for significant expansion. Importantly, we have continued to extend the mineralized footprint at the Hinge Target and confirmed our geologic model,” commented Tim Clark, CEO of Fury. “The results of the first three 2023 drill holes at Eau Claire are also important as we prepare for our resource update at year-end. As for the impact of the forest fire, we had a four-week hold on operations, but we are now actively drilling at full capacity with a helicopter and two drills turning on the property. Investors should expect a steady flow of news through year-end from Eau Claire, Percival, and a number of strong prospective anomalies to the east. With a recent directors and management site visit behind us, the three takeaways were: the reminder of the incredible infrastructure backdrop that exists in the James Bay region, the visual size and scale of

the Eau Claire project today, and the tremendous potential for discovery surrounding the 30 kilometres of the Cannard Deformation Zone.”

Table 1: Eau Claire Drill Results

Hole ID	From	To	Length (m)	Au g/t
23EC-062	<b>451</b>	<b>452</b>	<b>1.00</b>	<b>10.35</b>

749.5	757	7.50	1.30	

Main intervals - Au grade\*thickness no less than 2 g/t\*m with grade is no less than 1 g/t, maximum consecutive dilution 2m  
Sub-intervals - Au grade\*thickness no less than 7 g/t\*m with grade is no less than 3.5 g/t, maximum consecutive dilution 2m  
Downhole thickness was used due to the unknown zone orientations

## Western Hinge Target

The 2023 exploration program at the Hinge Target is focusing on the continued expansion of the gold mineralization to the west and up-dip while tightening up the drill spacing to 70-80m to prove continuity. The reported intercepts at the Hinge Target are defined by two 100m wide corridors of mineralization each hosting multiple subvertical quartz tourmaline veins (Figure 2). A total of nineteen discrete veins have been modeled within the two corridors to date. The Hinge Target remains open in all directions.

“The results from these first three 2023 drill holes build on the 2022 success at the Hinge Target. We have confirmed both continuity of the vein corridors as well as that the system remains open. The broad widths of mineralization, which we do not see typically within the core of the deposit, indicate the mineralization event at the Hinge Target was particularly intense. We look forward to additional results as the drill moves east towards the defined Eau Claire resource,” stated Bryan Atkinson, SVP, Exploration of Fury.

### Sampling and Assaying Disclosure

Analytical samples for the Drill Program were taken by sawing HQ diameter core into equal halves on site with one half sent to ALS Chemex in Val D'or, Quebec, Canada for preparation and analysis. All samples were assayed using a 50 g nominal weight fire assay with inductively coupled plasma – atomic emission spectrometry finish (Au-ICP22) and multi-element four acid digest ICP-AES/ICP-MS method (ME-MS61). Where Au-ICP22 results were greater than 0.5 ppm Au the assay was repeated with a 50 g nominal weight fire assay with atomic absorption finish (Au-AA24). Samples containing more than 10 ppm by Au-AA24 were re-assayed with 50 g nominal weight fire assay with gravimetric finish (Au-GRA22). QA/QC programs using internal standard samples, field and lab duplicates and blanks indicate good overall accuracy and precision.

David Rivard, P.Geo, Exploration Manager at Fury, is a "qualified person" within the meaning of Canadian mineral projects disclosure standards instrument 43-101 and has reviewed and approved the technical disclosures in this press release.

### **About Fury Gold Mines Limited**

Fury Gold Mines Limited is a well-financed Canadian-focused exploration company positioned in two prolific mining regions across Canada and holds a 59.5 million common share position in Dolly Varden Silver Corp (23.4%). Led by a management team and board of directors with proven success in financing and advancing exploration assets, Fury intends to grow its multi-million-ounce gold platform through rigorous project evaluation and exploration excellence. Fury is committed to upholding the highest industry standards for corporate governance, environmental stewardship, community engagement and sustainable mining. For more information on Fury Gold Mines, visit [www.furygoldmines.com](http://www.furygoldmines.com).

### **Forward-Looking Information and Additional Cautionary Language**

This release includes certain statements that may be deemed to be "forward-looking information" or "forward-looking statements" within the meaning of applicable securities laws, which relate to the future operations of the Company and other statements that are not historical facts. Forward-looking information contained in this release primarily relates to statements that suggest that future work at the Hinge or Eau Claire areas will increase or upgrade the estimated gold resources.

Although the Company believes that the assumptions and expectations reflected in those forward-looking statements were reasonable at the time such statements were made, there can be no assurance given that such assumptions and expectations will prove to be correct. Exploration is a high-risk enterprise.

Readers should refer to the risks discussed in the Company's Annual Information Form and MD&A for the year ended December 31, 2022 and subsequent continuous disclosure filings with the Canadian Securities Administrators available at [www.sedar.com](http://www.sedar.com) and the Company's Annual Report including the

Base Shelf Prospectus available at [www.sec.gov](http://www.sec.gov). Readers should not place heavy reliance on forward-looking information, which inherently can only as of the date made.

### **Cautionary Note to United States Investors Concerning Estimates of Mineral Disclosure**

The mining and technical disclosure throughout this release is made in accordance with applicable Canadian law and the guidelines set out in the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM"). The Company's descriptions of its projects using applicable CIM terminology, which includes defined terms such as inferred, measured or indicated resources, may not be comparable to similar information about resource grades that would be made public by U.S. companies which are subject to the reporting and disclosure requirements under the United States federal securities laws.
