UEC Comments on the Presidential Memoranda Issued on Uranium and Establishment of the U.S. Nuclear Fuel Working Group

Corpus Christi, TX, July 15, 2019 – Uranium Energy Corp (NYSE American: UEC, the “Company” or “UEC” - https://www.commodity-tv.net/c/search_adv/?v=298819) is pleased to provide comments on President Trump’s “Memorandum on the Effect of Uranium Imports on National Security” which was issued after the market close on July 12, 2019.

UEC Chairman and former U.S. Energy Secretary, Spencer Abraham commented: “The Trump Administration is to be commended for elevating the topic of U.S. uranium mining to the top of our national security and energy security agenda. At a time when we have bi-partisan support for the clean, baseload energy that nuclear power provides, it is crucial that the domestic supply chain is available for over 50% of our nation’s carbon free electricity generation. We will certainly make ourselves available to assist the newly formed U.S. Nuclear Fuel Working Group in any way possible.”

President and CEO, Amir Adnani stated: “The White House released the complete, much-anticipated decision late Friday evening. We are very pleased with President Trump’s decision in establishing the U.S. Nuclear Fuel Working Group, co-chaired by White House National Security Advisor John Bolton and National Economic Policy Advisor Larry Kudlow. The President has instructed the Working Group to develop recommendations for reviving and expanding domestic nuclear fuel production, including uranium mining, and to submit their findings within 90 days.”

Adnani continued: “Ultimately, we remain even more positive and excited about the improving fundamentals in the uranium market, with a growing global deficit between primary production and reactor requirements. We fully expect demand to continue to grow with the world’s need for the highly reliable, carbon-free, safe energy that nuclear power provides. UEC’s business plan, regardless of whatever policy actions emerge from the Working Group, will be to continue developing and advancing low-cost, environmentally friendly in-situ recovery (ISR) projects, that can be competitive in the global market.”

President Trump issued the Memorandum in response to the U.S. Department of Commerce Section 232 investigation of the U.S. nuclear fuel industry. In the Memorandum, the President stated that; “I agree with the Secretary [of Commerce] that the United States uranium industry faces significant challenges in producing uranium domestically and that this is an issue of national security.”
