TerraPower and Uranium Energy Corp Announce MOU to Collaborate on Domestic Uranium Fuel Supply for the Natrium Reactor

Casper, Wyoming, and Bellevue, Washington – November 28, 2023 – TerraPower and Uranium Energy Corp (NYSE American: UEC, the “Company” or “UEC” - <https://www.commodity-tv.com/ondemand/companies/profil/uranium-energy-corp/>) announced today a memorandum of understanding (“MOU”) with objectives of reestablishing domestic supply chains of uranium fuel. This MOU will allow TerraPower and UEC to explore the potential supply of uranium for TerraPower’s first-of-kind Natrium™ reactor¹ and energy storage system.

The Natrium demonstration project, being built in Kemmerer, Wyoming, will be a commercial scale plant upon completion and will begin operations within a decade.

UEC and TerraPower have made significant investments in the nuclear fuel cycle and commercial scale deployment of clean energy projects that will directly benefit the U.S. economy. This includes delivering carbon-free power, high paying jobs, and providing support for establishing a robust U.S. nuclear fuel supply chain for Small Modular (“SMR”) and Advanced Reactors (“AR”) and their high assay low enriched uranium (“HALEU”) requirements. These new reactors, like TerraPower is advancing in Wyoming, present innovative leaps in technology that can help address the world’s growing clean energy needs with abundant 24/7, carbon-free power.

SMRs and ARs present the fastest growing segment of nuclear energy in the United States and need a secure, domestic fuel supply chain. The first step of the supply chain is uranium, and UEC’s Wyoming resources have the critical mass to be a highly reliable source of uranium for American HALEU and a good strategic fit to supply TerraPower’s Natrium reactor.

Wyoming’s Governor Mark Gordon stated “This MOU is a great step forward for the Wyoming uranium industry, which is host to the largest uranium reserves in the United States. It makes no sense to depend on Russian uranium and enrichment technology, when a fully domestic fuel source can be found here in Wyoming and manufactured in the United States. TerraPower chose Wyoming as a partner for their Natrium advanced nuclear reactor plant. Once again, they are demonstrating leadership and commitment to a nuclear future in Wyoming through this MOU with Uranium Energy Corp.”

“TerraPower continues to move forward in bringing the Natrium reactor to market, and that includes establishing our fuel supply chain,” said Chris Levesque, TerraPower President and CEO. “A robust, domestic supply chain for nuclear fuel is crucial as we deploy the next generation of nuclear energy. Wyoming has long been a leader in uranium mining, and we look forward to collaborating with UEC on the potential opportunity for Wyoming uranium to fuel our first reactor.”

Amir Adnani, UEC President and CEO stated: “UEC is pleased to form strategic relationships that support the emerging uranium demand from SMRs and ARs, and we look forward to working with

¹ A TerraPower and GE Hitachi technology

TerraPower and the prospect of providing the uranium they need to operate their Wyoming Natrium reactor. In these geopolitically complex times, UEC's vision is to be the leading provider of conflict-free, American uranium for the existing, as well as the new reactors that will come online."

The Natrium technology is a 345-megawatt sodium-cooled fast reactor coupled with a molten salt-based energy storage system that can boost power output to 500-megawatts to serve peak demand: making it the ideal technology to pair with energy grids that have high penetrations of renewable resources. The Natrium reactor is the only advanced reactor that can provide stability to the grid with clean, baseload energy while seamlessly boosting output to meet variable power needs.

UEC's Wyoming production platform includes a portfolio of over 20 uranium projects, that in total contain the largest S-K 1300 compliant resource base in the United States. Four of the projects in the Powder River Basin are fully permitted for in-situ recovery ("ISR") production including the Irigaray Central Processing Plant and Christensen Ranch ISR facilities in Johnson County, Wyoming where UEC's initial production will be focused.

About TerraPower

TerraPower is a leading nuclear innovation company that strives to improve the world through nuclear energy and science. Since it was founded by Bill Gates and a group of like-minded visionaries, TerraPower has emerged as an incubator and developer of ideas and technologies that offer energy independence, environmental sustainability, medical advancement and other cutting-edge opportunities. It accepts and tackles some of the world's most difficult challenges. Behind each of its innovations and programs, TerraPower actively works to bring together the strengths and experiences of the world's public and private sectors to use advanced nuclear to answer pressing global needs. About Uranium Energy Corp

Uranium Energy Corp is the fastest growing supplier of the fuel for the green energy transition to a low carbon future. UEC is the largest, diversified North American focused uranium company, advancing the next generation of low-cost, environmentally friendly ISR mining uranium projects in the United States and high-grade conventional projects in Canada. The Company has two production-ready ISR hub and spoke platforms in South Texas and Wyoming. These two production platforms are anchored by fully operational central processing plants and served by seven U.S. ISR uranium projects with all their major permits in place. Additionally, the Company has diversified uranium holdings including: (1) one of the largest physical uranium portfolios of U.S. warehoused U3O8; (2) a major equity stake in Uranium Royalty Corp., the only royalty company in the sector; and (3) a Western Hemisphere pipeline of resource stage uranium projects. The Company's operations are managed by professionals with decades of hands-on experience in the key facets of uranium exploration, development and mining.

Safe Harbor Statement

Except for the statements of historical fact contained herein, the information presented in this news release constitutes "forward-looking statements" as such term is used in applicable United States and Canadian securities laws. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management. Any other statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends", or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved) are not statements of historical fact and should be viewed as "forward-looking statements". Such forward looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such risks and other factors include, among others, the actual results of exploration activities, variations in the underlying assumptions associated with the estimation or realization of mineral resources, the availability of capital to fund programs and the resulting dilution caused by the raising of capital through the sale of shares, accidents, labor disputes and other risks of the mining industry including, without limitation, those associated with the environment, delays in obtaining governmental approvals, permits or financing or in the completion of development or construction activities, title disputes or claims limitations on insurance coverage. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. Many of these factors are beyond the Company's ability to control or predict. There can be no assurance that such statements will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements contained in this news release and in any document referred to in this news release. Important factors that may cause actual results to differ materially and that could impact the Company and the statements contained in this news release can be found in the Company's filings with the Securities and Exchange Commission. For forward-looking statements in this news release, the Company claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. The Company assumes no obligation to update or supplement any forward-looking statements whether as a result of new information, future events or otherwise. This news release shall not constitute an offer to sell or the solicitation of an offer to buy securities.
