

USCM Initiates Permitting Process to Drill Clayton Ridge Lithium Property

Vancouver, British Columbia / March 22, 2023 – US Critical Metals Corp. (“USCM” or the “Company” - <https://www.commodity-tv.com/ondemand/companies/profil/us-critical-metals-corp/>) (TSXV: USCM, OTCQB: USCMF; FSE: 0IU0) is pleased to announce that the Company has initiated permitting with the Bureau of Land Management (“BLM”) to diamond drill up to 2,000 meters at the Clayton Ridge Lithium Property (the “Property”). The Property is located in Esmeralda County, Nevada and spans a total of approximately 3,600 acres covering a hanging basin above the Clayton Valley (as outlined in the map below), which is the only lithium producing region within the United States. USCM has the right to acquire a 100% interest in the Property.

USCM has engaged Westland Engineering & Environmental Services, Inc. to complete and file a Notice of Intent (“NOI”) with the BLM in the coming days to permit the Phase 1 diamond drilling. The NOI provides up to five acres of disturbance area, which is more than sufficient for the current drill plan. Phase 1 will comprise of up to fourteen diamond drill holes to test the most compelling targets identified to date. The proposed program will test down to depths of up to 250 meters providing invaluable information related to the thickness and grades of the lithium-bearing units across the Property. The Company will be forthcoming with a press release describing the respective drill targets included in the upcoming campaign.

To fulfill the earn-in requirements set forth in the option agreement for the Property, USCM is contractually required to make an additional cash payment of US\$75,000, issue 500,000 common shares, and complete 1,500 meters of exploration drilling during the 2023 field season. The Company has previously issued 1,000,000 common shares to the vendor and satisfied

US\$150,000 in cash payments. The Company expects to complete these final requirements of the option agreement in 2023, upon which it will have acquired 100% ownership of the Property.

Management Commentary

Mr. Darren Collins, Chief Executive Officer and Director of USCM, comments: “USCM spent much of 2022 completing surface sampling and detailed mapping of the Clayton Ridge Lithium Property. We were highly encouraged by what we saw in the grades, interpreted widths, and overall scale of the Property’s lithium bearing claystone units. We are thrilled to be moving toward our inaugural drill campaign in second quarter of this year as the first company to ever drill the asset and look forward to satisfying all remaining conditions of the option agreement. We are excited to advance Property during the upcoming field season.”

QP Statement

Robert J. Johansing, BSc (geology), MSc (economic geology), who is a qualified person as defined in National Instrument 43-101 – Standards of Disclosure for Mineral Projects (the “QP”), mapped the clay beds at Clayton Ridge to define the geologic environment and the presence of the noted mineralization. The scientific and technical information contained in this news release has been reviewed and approved by the QP.

Project Overview

The Clayton Ridge Lithium Property (the “Property”) is a lithium claystone deposit located in Esmeralda County, Nevada on the east flank of the Clayton Valley, the only lithium producing region of the United States. The Property is located just 18 kilometers west of Goldfield, Nevada and roughly 17 km southeast of Silver Peak, Nevada, lying within a topographic swale between the Montezuma Range and Clayton Ridge. The project is comprised of 180 unpatented lode mining claims, covering 3,600 acres, with easy driving access to all claims. The Property is one of several lithium projects in region. In addition to the only operating lithium producer in the US (Albemarle), the Clayton Valley and immediate surroundings host several lithium projects ranging from early- to late-stage exploration (including, but not limited to, Noram Lithium, Pure Energy, American Lithium, Loneer Ltd., Cypress Development and Spearmint Resources).

Termination of Marketing Agreement

USCM also announces the termination of the marketing agreement entered into with Promethean Marketing, Inc. (“Promethean”). Prior to termination, Promethean provided advertising, corporate marketing and investor awareness services to USCM, including, but not limited to, content creation management, author sourcing, project management and media distribution. For more information, please see the news release of USCM dated June 6, 2022.

About US Critical Metals Corp.

USCM is focused on mining projects that will further secure the US supply of critical metals and rare earth elements, which are essential to fueling the new age economy. Pursuant to option agreements with private Canadian and American companies, USCM's assets consist of four agreements, each providing USCM with the right to acquire interests in five discovery focused projects in the US. These projects include the Clayton Ridge Lithium Project located in Nevada, the Sheep Creek Rare Earth Project located in Montana, the Haynes Cobalt Project located in Idaho, the Lemhi Pass Rare Earth Project located in Idaho and the Long Canyon Uranium Project

located in Idaho. A significant percentage of the world's critical metal and rare earth supply comes from nations with interests that are contrary to those of the US. USCM intends to explore and develop mineral resources with near- and long-term strategic value to the advancement of US interests.
