

## What moves Germans

The British switch to campaign mode, cannabis is to be legalized or provisioning for the twilight years, but how - are some of the issues

Many topics move Germany. Germany's politicians are discussing a controlled release of cannabis, perhaps through pharmacies or licensed businesses. The European cannabis market is growing and growing. Countries in Europe are rethinking the use of medicinal cannabis to give patients access to alternative treatment. Other countries allow recreational use, such as Canada.

Companies such as RavenQuest BioMed, which produce cannabis, serve the increasing demand. The company has successful manufacturing facilities in Markham, Ontario and Edmonton, Alberta. The collaboration with McGill University is a special feature of RavenQuest BioMed.

A seemingly never-ending topic is Brexit. Now, January 31 is to be the leaving date. New elections will be held in the UK on 12 December. Uncertainties have therefore not yet been removed and should therefore give the gold price further impetus. And the price of gold and its development is an important issue when it comes to old-age provision. Hardly a day goes by without reading and hearing about the bleak prospects for statutory pensions. Private provision is absolutely necessary, and this is also a constant occurrence. But how, when saving is no longer worth it.

The idea of investing part of your savings in gold and selected gold stocks in the longer term in order to preserve and, if possible, increase your assets is a good option and should be taken into consideration. There are many gold companies, so you have to choose carefully. For example, Auryn Resources is convincing. - [https://www.youtube.com/watch?v=A\\_jrxUZN-BE=1s](https://www.youtube.com/watch?v=A_jrxUZN-BE=1s) - Auryn Resources pursues seven projects and places particular emphasis on high-grade projects. Most important are the Committee Bay Gold Project in Nunavut and the Sombrero Copper Gold Project in Peru.
